

15 Minute Check Out "G" Board

- "G" board - change S4 Dip switches 5+6 to OFF
- Turn unit off then back on
- After 5 min. in the freeze cycle drain water and allow float switch to open, unit will go back to harvest (verifies float operation)
- Allow unit to go back into freeze and after 5 min. in freeze pull wire off K5 connector unit will now go through pump out after 15-20sec. delay
- Confirm unit cycles correctly (Remember to change S4 back to original settings)
- * not all machines will have Positive Harvest
